

Pharmacy Displays

**Ensure that your business performs to its maximum potential and outshines all competition!
Stand out from the crowd and get noticed! Being highly visible will attract attention and offer your business the opportunity to promote the many services that the modern Pharmacy provides.**

Scanlite is one of the UK's leading manufacturers, designers, suppliers and retailers of digital signs and sign display systems. From a purpose built factory and showroom in the North West we create LED and LCD information displays. We have successfully completed over 30,000 installations in the UK and worldwide since the company was first established in 1980.

Scanlite is pleased to introduce The LED Pharmacy Cross, the newest edition to our extensive range of displays. The green cross is recognised worldwide as the universal symbol of the Pharmacy. Ensure that your Pharmacy is always highly visible.

LED technology offers the maximum brightness levels available making a sign visible even during daylight or in direct sunlight.

The Scanlite incorporated control technology offers animation and movement which will capture the attention and focus of potential customers.

All Pharmacy Crosses can be programmed simply and offer boundless opportunities to inform customers and the local community of products and services.

Scanlite LED Pharmacy Crosses can also be used to display the time and date as well as the current temperature helping to create a focal point in any town or city.

Installing a cutting edge sign and a high technology communication instrument will raise the profile of any Pharmacy and ensure that the business is perceived as a modern, forward thinking service provider.

LED technology is environmentally friendly as it is extremely energy efficient, lowering the carbon footprint of your business. Built in light sensors ensure that the Pharmacy Cross always performs at optimum levels.

Each Pharmacy Cross is housed in a waterproof casing and is easily installed by our team of highly skilled engineers. All displays are easy to maintain and extremely energy efficient.

Scanlite's reputation for high quality LED and LCD displays has been built over many years by providing consistent levels of customer care and satisfaction.

Please contact our sales team for any further information or if you would like to arrange a visit to our factory.
